## DETAILED ACTION

### *Election/Restrictions*

1. Applicant's election with traverse of invention of claim 1 in the reply filed on 4/2/07 is acknowledged. The traversal is on the ground(s) that searches for and examination of the two inventions would be similar. This is not found persuasive because the inventions are separately classified and the search for one is not required for the other. Not only are the two searches and examinations related to different subject matter but in all likelihood, a different examiner, one having particular experience in the area of doors and/or seals would be called on to examine the non-elected invention if a divisional Application is filed drawn to that invention.

The requirement is still deemed proper and is therefore made FINAL.

### *Claim Rejections - 35 USC § 102*

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claim 1 is rejected under 35 U.S.C. 102(b) as being anticipated by U.S. Pat. No. 1,625,941 to Hoffenberg.

Hoffenberg '941 teaches Applicant's claim limitations including : a "gear reduction handle" – including 18,19, and a "lower door opening push member" – 21.

***Conclusion***

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

U.S. Pat. No. 2,210,229 to Boerner.

U.S. Pat. No. 2,926,399 to Ramunas.

U.S. Pat. No. 4,461,597 to Laurin.
